

Division Adventure - Intermediate

Grade 2 Division Worksheet

Name: _____

Date: _____

Get Ready to Share!

Division is like sharing your treats equally. Read the examples and then try the fun problems!

What is Division?

Sharing equally is the key. For example: 10 cookies divided by 2 friends give 5 each.

Example: $10 \div 2 =$

Now try: $12 \div 3 =$

Share the Treats!

Look at the images and imagine sharing them equally.

If there are 12 cupcakes and 4 boxes, how many cupcakes per box?

$$12 \div 4 = \boxed{}$$

If there are 14 candies and 2 jars, how many candies per jar?

$$14 \div 2 = \boxed{}$$

÷ Practice Division

Solve these fun problems.

$$6 \div 2 = \boxed{}$$

$$8 \div 2 = \boxed{}$$

$$9 \div 3 = \boxed{}$$

Sharing Stories

Read the story, draw if you like, and solve the problem.

An artist has 16 crayons and wants to divide them equally among 4 friends. How many each?

Drawing space:

$$16 \div 4 = \boxed{}$$

A baker makes 15 muffins and packs them equally into 3 boxes. How many muffins per box?

Drawing space:

$$15 \div 3 = \boxed{}$$

Answer Key

Concept:

- $10 \div 2 = 5$
- $12 \div 3 = 4$

Visual Sharing:

- $12 \div 4 = 3$
- $14 \div 2 = 7$

Practice:

- $6 \div 2 = 3$
- $8 \div 2 = 4$
- $9 \div 3 = 3$

Word Problems:

- $16 \div 4 = 4$
- $15 \div 3 = 5$

Great Job!

Color a smiley face for each section you complete!

Keep sharing and have fun with division!
