

Division Fun - Easy Level

Grade 2 Division Worksheet

Name: _____

Date: _____

How to Use This Worksheet

Learn division by sharing small groups equally.

What is Division?

If you have 6 cookies and 2 friends, each friend gets the same number.

$$6 \div 2 = \boxed{}$$

Sharing Treats

Simple sharing using treats.

If there are 8 candies and 2 bags, how many candies per bag?

$8 \div 2 = \square$

÷ Practice Division

Solve these very simple problems.

$4 \div 2 = \square$

$6 \div 3 = \square$

Advanced Division Challenges

Solve these challenging division problems to become a division master!

$36 \div 6 = \square$

$42 \div 7 = \square$

$28 \div 4 = \square$

$48 \div 8 = \square$

$56 \div 7 = \square$

Extra Advanced Division Challenges

Solve these extra challenging division problems:

$63 \div 7 = \square$

$54 \div 6 = \square$

$72 \div 8 = \square$

Real-Life Division Problems

Solve these real-life problems to see how division works every day:

A farmer has 36 eggs and packs them equally into 6 cartons. How many eggs in each carton?

$36 \div 6 = \square$

A school has 48 pencils distributed equally among 8 classes. How many pencils does each class get?

$$48 \div 8 = \boxed{}$$

A library received 84 new books and arranged them equally on 7 shelves. How many books per shelf?

$$84 \div 7 = \boxed{}$$

Tricky Division Puzzles

Now try these multi-step puzzles to test your division skills:

A teacher divided 48 pencils equally among her students. Then she gave each student 2 extra pencils. If every student now has 8 pencils, how many students are there?

Answer:

If you have 25 apples and share them equally among 4 children, how many apples does each child get and how many are left? Write your answer as: "each gets __, remainder __".

If 64 is divided equally into 8 groups and then you subtract 3 from each group's share, what number does each group have?

Answer:

Divide 50 by 4. If you round down the quotient and then add 2, what do you get?

Answer:

You have 37 candies. If you distribute them equally among 5 friends, what is the quotient, and what is the difference between the remainder and 3? (Answer format: "quotient __, difference __")

If 72 is divided by 9 and then the result is multiplied by 2, what is the final answer?

Answer:

Answer Key

Basic Concept:

- $6 \div 2 = 3$

Sharing Treats:

- $8 \div 2 = 4$

Practice:

- $4 \div 2 = 2$
- $6 \div 3 = 2$

Advanced Challenges:

- $36 \div 6 = 6$
- $42 \div 7 = 6$
- $28 \div 4 = 7$

- $48 \div 8 = 6$
- $56 \div 7 = 8$
- $63 \div 7 = 9$
- $54 \div 6 = 9$
- $72 \div 8 = 9$

Real-Life Problems:

- $36 \div 6 = 6$
- $48 \div 8 = 6$
- $84 \div 7 = 12$

Tricky Division Puzzles:

- Teacher Puzzle: 48 pencils with +2 extra makes 8 pencils per student, so $48 \div 6 = 8$ students.
- $25 \div 4 = 6$ remainder 1
- $64 \div 8 = 8$, then $8 - 3 = 5$
- $50 \div 4 = 12$, round down to 12, then $12 + 2 = 14$
- $37 \div 5 = 7$ remainder 2, difference with 3 is 1
- $72 \div 9 = 8$, then $8 \times 2 = 16$

Great Job!

Color a smiley face for each section you complete!

Keep practicing and have fun with division!
